A student of Automation Engineering Technology at Diponegoro University with a strong interest in technology development and automation systems. Throughout my studies, I have learned various technical concepts that support the industry and have been actively involved in student organizations, where I served as a Division Head. This experience has enhanced my skills in leadership, management, teamwork, and communication. With a solid educational background and practical experience, I am committed to continuing my learning journey and contributing to the fields of technology and innovation.

EDUCATION

Applied Bachelor of Automation Engineering Technology

(January 2023 - Present)

Diponegoro University

- As a student majoring in Automation Engineering Technology at Diponegoro University, I focused on mastering automation technology and systems that support various industrial sectors, including Computer-Aided Design (CAD), Programmable Logic Controller (PLC), Supervisory Control and Data Acquisition (SCADA), and Management and Analysis of Processing Control Systems. During my studies, I was actively involved in various academic and non-academic activities that enhanced my technical skills and soft skills.

Teknik Manajemen Perawatan Otomotif

(July 2019 - May 2023)

SMKN 7 Semarang

- As a Vocational High School student majoring in Automotive Maintenance Management Engineering, I have undertaken an education focused on technical subjects such as engine maintenance, workshop management, and automotive systems. During my studies, I actively participated in various academic and extracurricular activities that supported the development of technical knowledge and analytical skills.
